

# Predictable. Intuitive. Secure.

FileControl is an international leader in providing business strategies and solutions for the legal and economic marketplace through its Virtual Deal Rooms (VDR). The VDR streamlines the management of mergers & acquisitions, loan syndications, alternative investments and private equity transactions. FileControl recognizes the concerns of corporations, General Counsel and law firms with regard to emerging, stringent regulatory and compliance measures. We understand cross-border, privacy and other international data management issues and work as a partner in providing predictable, auditable and secure protocols, streamlining the mergers & acquisitions process.

FileControl's VDR can be deployed as an enterprise or SAAS solution and provides a secure workspace to:

- Easily Organize & Track your Information
- Rapidly Access and Search key documents
- SAS 70 II Security – Restrict Access to confidential documents
- Satisfy Global Access and Collaboration requirements
- Manage and Track User Activity, including IP address and computer name
- Rapid implementation with immediate document loading capability

Deals completed around the globe today require a central repository for global access to your sensitive information on a 24/7 basis. Confidentiality is paramount and strict security controls for viewing, copying and printing are imposed.

## Product Features

- Drag-&-Drop streamlines the process of uploading providing virtually real time access to the documents
- Ability to add users via mobile devices
- Allows Deal Room owners to "Lock" documents, disabling print screen, printing and downloading of documents.
- User & Group Level Security to access confidential documents
- Ensures secure online document storage (SSL)
- Deal Room owners can track user activity generating real-time reports directly from FileControl's VDR
- Predictable pricing without any "Hidden Charges"

## Product Benefits

- Maximized asset valuation, by tracking your prospects in REAL TIME
- IT / hardware investment is not required
- Time involved to set up a VDR is minimal
- Available 24/7
- Ability to handle over 300 document types; including Excel, Word, PDF, JPEGs, Tiff, etc

We offer fully-scalable solutions that can be implemented immediately and are available at a fraction of the cost of others.

As a recognized industry leader providing litigation and data management solutions for 10 years. FileControl has already established a wide customer base and a loyal following. FileControl holds the advantage in quality and functionality; we provide a high end product to meet the industry needs. **Call us for more information or schedule your demonstration.**

## Your data: under lock and key.

You control exactly who can access your data room, the documents they can see, and what they can do with those documents. All of your information is protected by these innovative, industry-leading application features:

**Dynamic watermarking:** Every document is embedded with a watermark and page footer that show project name, user name, date and time of access.

**Disabled print screen command:** FileControl's innovative image viewer prohibits the use of the "print screen" command to capture an image of the document.

**Role-based permissions:** You control whether users can only view, view and print, or view, print and save documents.

**Secure Internet access and a SAS 70 environment.**

**Ease of Use.** An intuitive interface enables you to easily add new users, find & filter information and exchange documents, saving time and improving communication.

**Effective Data Organization.** The ability to control and reorganize information quickly and easily allowing for increased efficiencies for all parties and is scalable to handle the growth of the transaction.
